

Eyelash Extensions

Eyelash extensions have arrived at Infusion – Charlotte has been wanting to get her hands on these for a very long time, now we have let her loose on you all! Women are choosing to throw away clumpy mascara looking for natural, full lashes and now they are at Infusion. A wonderful enhancement for those that have not been blessed with full length lashes and would like some added length and volume. After a consultation when length and curl are determined, each lash is then individually applied to your existing lash. Depending on the look desired you may choose discreet to Diva looking or anywhere in between. As your own lash sheds you will then need to have an infill to replace lost lashes.
